

11/15/2023

Greetings,

Today's retail and transportation markets demand constant innovation to remain competitive. In order to adapt, The Kroger Co. ("Kroger") has initiated numerous Transportation Visibility programs to dramatically improve how we do business together. We strive to become a customer of choice with you and recognize our current technology capabilities are one of the barriers to achieving that status.

With this in mind, Kroger has retained One Network Enterprises ("One Network"), based in Dallas, TX to collect the real-time location of all scheduled inbound loads to Kroger Distribution Centers (DCs) that is captured via your tractor's Electronic Logging Devices (ELD). To initiate this process change, all carriers, whether vendor-managed or Kroger-managed, must send ELD data to One Network every 15 minutes.

If you already have a One Network account, please send this ELD information via ELD, EDI, Mobile Application or API. For more, specific information on enabling your preferred method, visit the following site, <https://kroger.onenetwork.com/>. Please send this data to One Network by **February 1, 2024**.

If you do not have an account with One Network, you will need to create an account with One Network by visiting <https://www.onenetwork.com/register-to-join-one-network>. Please sign up by **January 1, 2024**, and have all data sent to One Network by **February 1, 2024**. Please note, brokers will be responsible for their carrier's compliance.

One Network will be responsible for aggregating and presenting all data to Kroger, but all asset carriers will be responsible for installing and maintaining the preferred connection that would communicate this data with One Network's platform.

To better understand your current ELD capabilities, please fill out the attached survey. Also, please confirm your acknowledgement of this announcement by signing and returning to Kroger before December 15, 2023. The point of contact regarding this matter is [contractssupplychain@kroger.com](mailto:contractssupplychain@kroger.com).

Thank you for your help and support.

Sincerely,

The Kroger Co.

ACCEPTANCE AND ACKNOWLEDGEMENT

Ken Braunbach, VP, Logistics & Transportation
